Overall Risk Assessment

Risk Score: 0.0/100 (Low Risk)

What We Found

Great news! No security issues were found in the scanned files.

What You Can Do

- Avoid using risky functions like 'eval()' that can run harmful code.
- Keep passwords and secrets out of your code—use secure storage instead.
- Run this scan regularly to catch issues early.
- Ask your team to follow safe coding habits.

Note: This tool is very thorough, but it's always a good idea to have an expert double-check important systems.
